Build a Bug House COMPETITION

Summer holidays are nearly here and around Earlswood and Tanworth-in-Arden there are bugs looking for somewhere cosy to stay. They have been working hard pollenating flowers, looking after soil and keeping pests at bay and now they need somewhere to relax.

Your mission is to build them a special Bug House where they can safely hide, using repurposed or recycled materials

What is a Bug House?

Bugs, insects and other tiny critters love holes, nooks and little gaps to crawl into where they can be safe from birds and small animals that would enjoy them for lunch.

A Bug House is something you can make in your gardens to help them. You can make one from things you might find around like pieces of garden cane, old bricks, pieces of wood, pine cones, bits of wood, straw, old pots— different bugs like different things.

They can come in all shapes and sizes, you can use your imagination to think about what the bugs near you will like best. Yours doesn't have to be the biggest—we're looking for your imagination and creativity.

How do I enter the Bug House Competition?

Take a photograph of your finished Bug House and email it, along with your full name and age, to Tanworth-in-Arden Parish Council office@tanworth-pc.org.uk or you can drop a photo into the Parish Office. The three best/most creative will win a prize.

Closing date – Friday 22nd August.
